

# Industrial Metal Coating Solutions

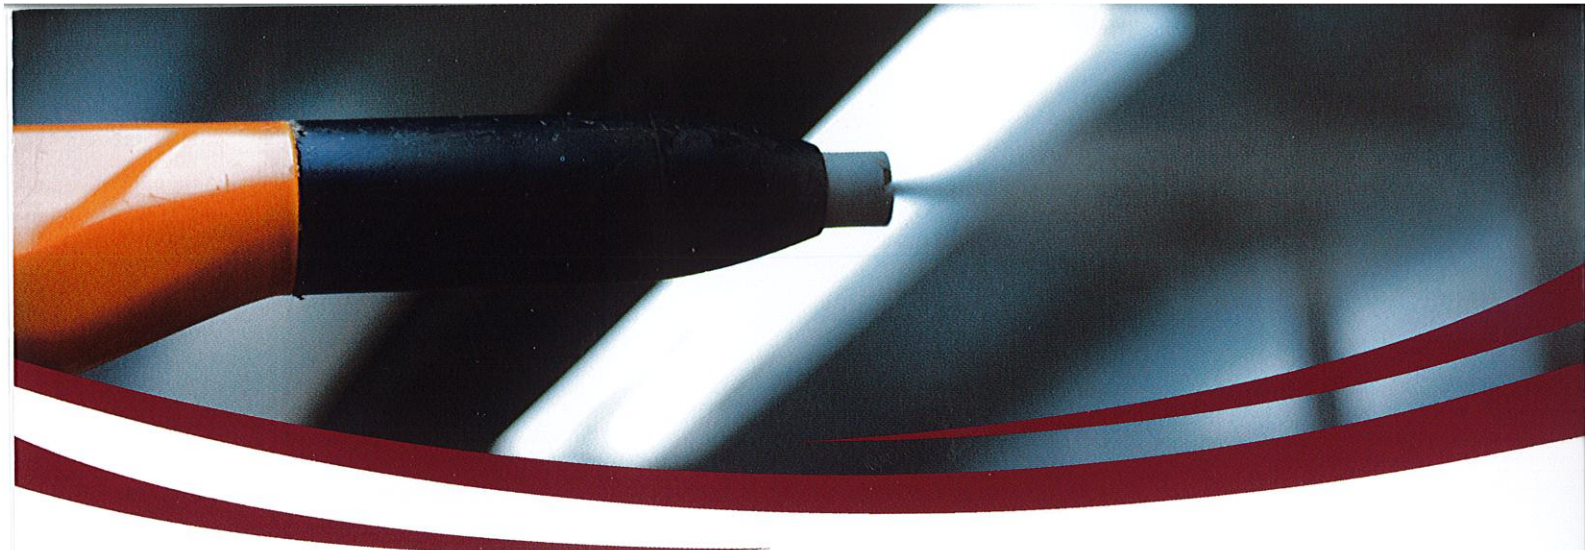

“  
SPECIALITY IS OUR  
STRENGTH  
”

**ICMS**

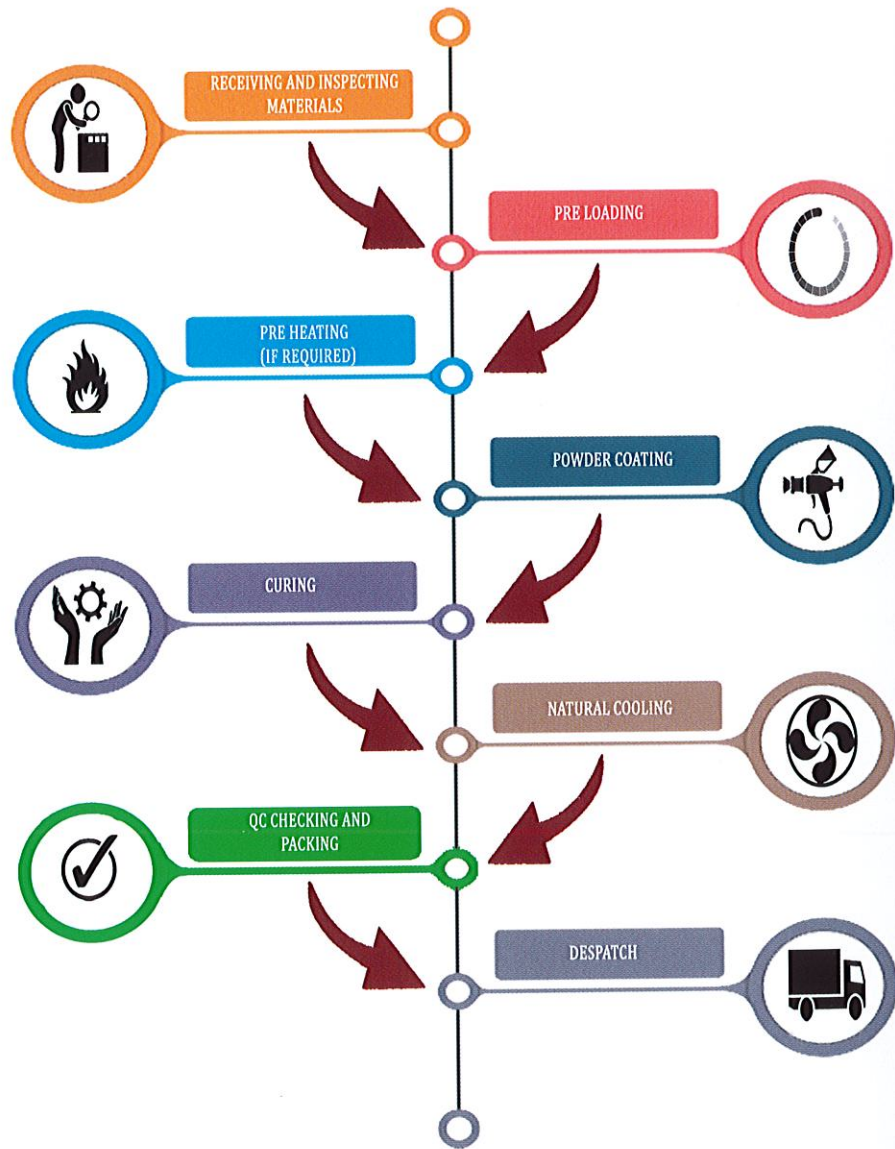

Industrial Cable Management Systems Co

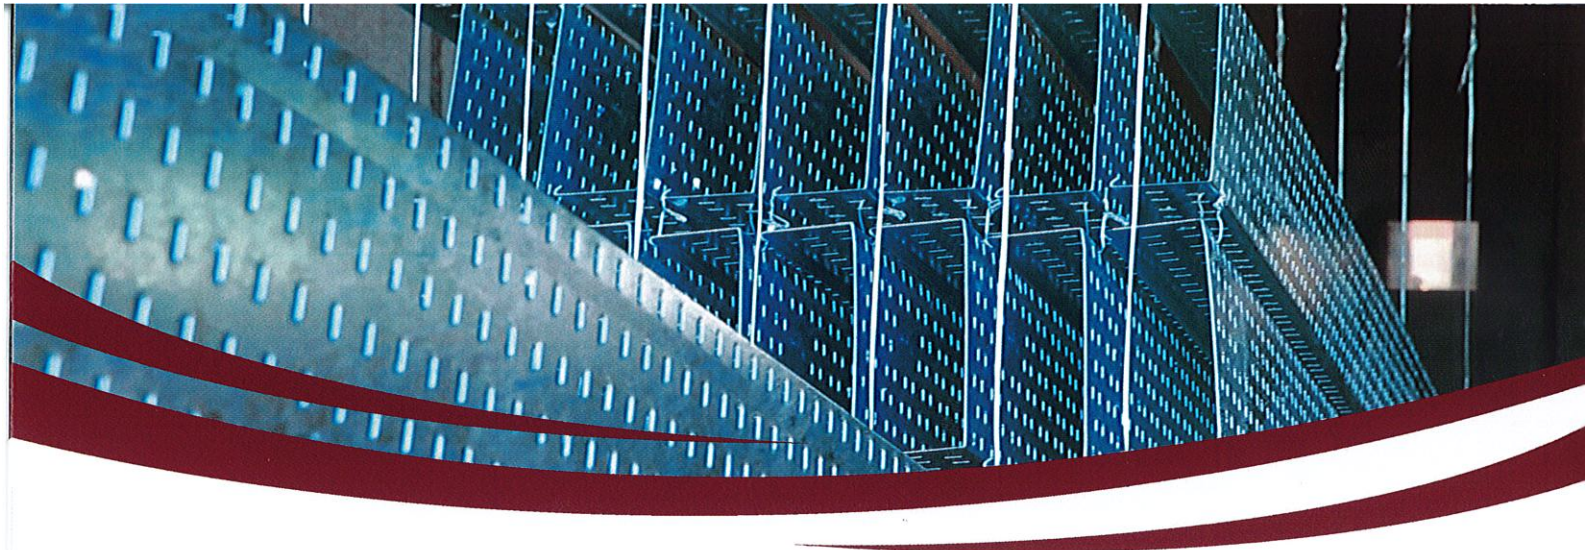

ICMS is a promised Powder Coating facility in Qatar. Our advanced processes are exemplified by our curing oven powder coating service. It is designed to provide high quality repeatable results for polyester and epoxy coatings. Working in volumes from prototypes and small quantities to large production runs. In-house testing for mil thickness, cure, adhesion, and hardness is completed for all of our powder coated components. Products such as GI Panel boards, GI boxes etc would be powder coated as per required colour. Our facility is capable of parts up to 3000mm long, 350mm wide and 1200mm high.

# POWDER COATING

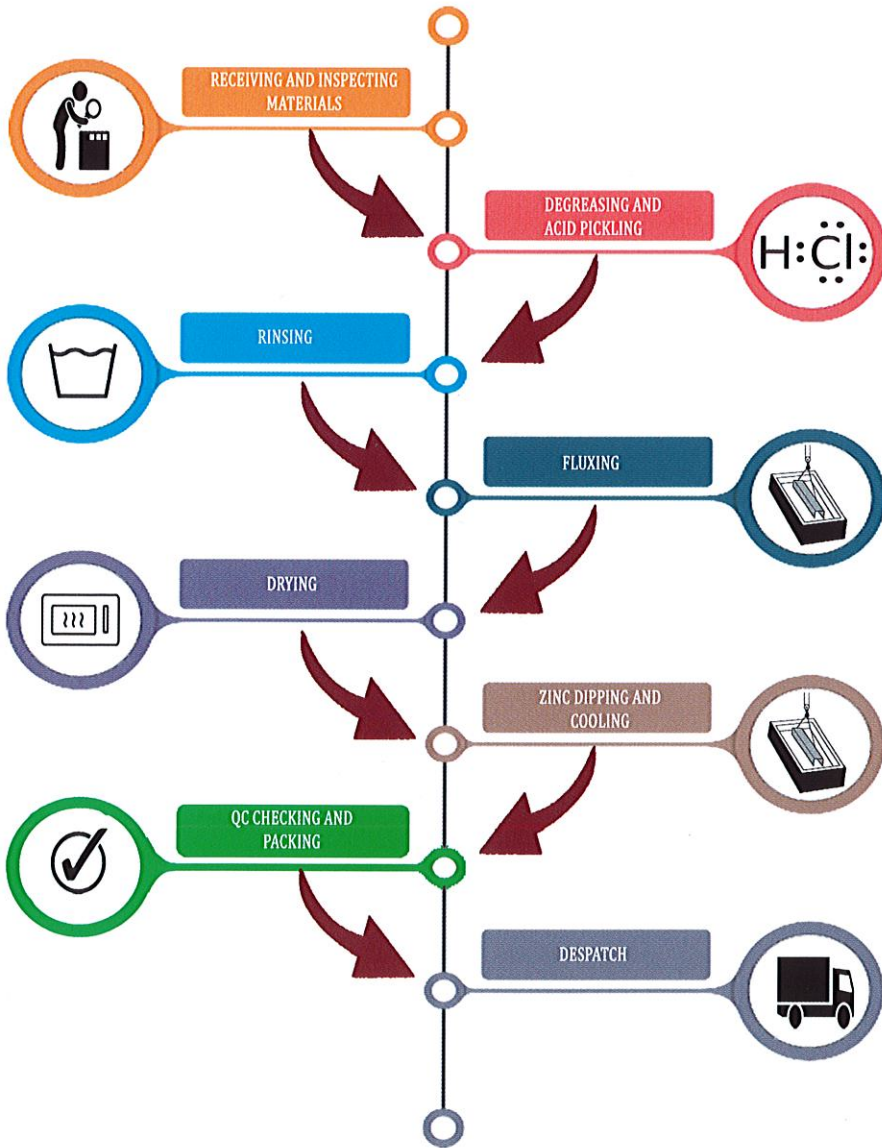

<b>Plant</b>	Continuous conveyerized system designed, installed and commissioned in compliance with International Standards.
<b>Coating System</b>	Automatic reciprocators fitted with two electrostatic guns on both sides one electrostatic manual gun on each side.
<b>Quality Control</b>	As per the international standards.
<b>Certifications</b>	ISO 9001:2008, ISO 14001:2015, OHSAS 18001:2007

# HOT DIP GALVANIZING

ICMS Galvanized products have been developed to meet the strict requirements of demanding customers. Our goal is to help people and contribute to society by manufacturing these and other products which provide high quality and performance. Our facility is capable of products up to 7000mm long, 1200mm wide and 1800mm high.

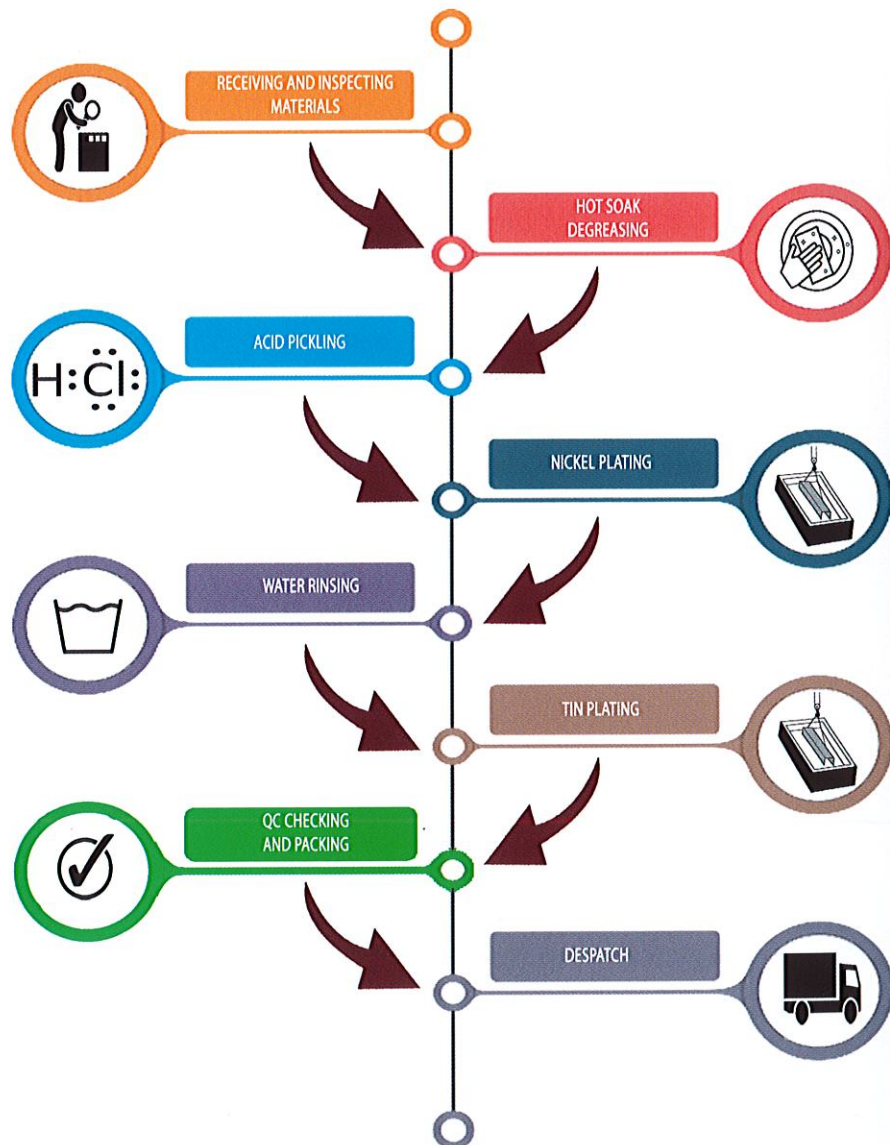

<b>Plant</b>	Semi-automatic plant, inclusive of the hot section (galvanising furnace and dryer) and chemical pretreatment area.
<b>Galvanizing System</b>	Semi automatic system with low emission, PLC controlled westech high velocity furnace, acid and zinc white fume extraction system.
<b>Quality Control</b>	As per the international standards.
<b>Certifications</b>	ASTM A123 BS EN 1461

## TIN & NICKEL PLATING

ICMS provides Acid Tin and Nickel plating. Our plating processes facilitate soldering and improve anti-galling properties in steel, brass, copper, plus numerous other substrates, which otherwise have poor solderability. Tin plating exhibits excellent corrosion resistance and conductivity in a variety of electrical as well as electronic components.

<b>Plant</b>	Manual barral plating setup for nickel and tin plating.
<b>Plating System</b>	The system consist of nickel and tin plating pp tank, air cooled rectifier, catridge type filter unit, chilling unit ,centrifugal dryer and Plating Barrels.
<b>Quality Control</b>	As per the international standards
<b>Certifications</b>	ISO 9001:2008, ISO 14001:2015, OHSAS 18001:2007.
